TM 1

Pulley has 2 anchor points. Upper anchor point on pulley is used for connecting crane TM 1 to a permanent structure. Lower anchor point on arm is used for installation of rescue lifting devices.

Leg is made of hot-dip galvanized steel, has 4-step adjustment, and is locked with a cotter.

Connector enables adjustment of the arm angle and locking in one of 5 positions (from 80° up to 130°) by means of a cotter.

Lower end of leg has a removable foot with rubber pads providing anti-slip protection.

Height:	71 - 280 cm
Opening diameter under tripod:	-
Leg spacing:	-
Device weight:	8 kg
Anchor points on head:	2
Lifting and lowering:	1 person only
Transport dimensions:	190 x 22 x 22 cm

TM 6

The head is made of powder coated galvanized steel. Equipped with 2 wheels for guiding the work rope on rescue lifting devices. Cotters above the wheels protect the rope against accidental slipping during work.

Automatic leg opening locks protect the tripod against accidental collapse during use.

Support bars are made of powder coated galvanized steel. They help stabilize the tripod during work. Each bar is secured with ratchets to prevent it from detaching during work

The tripod legs are made of strengthened aluminium profiles. Two legs “A” are equipped with a wheel (for guiding the work rope) and anchor point (bore) for mounting winches; the third leg “B” has no wheel or anchor point.

Two legs „A” are equipped with swivel wheels with brake to provide easier tripod mobility. Wheels are made of aluminium alloy and rubber (wheel) and galvanized steel (housing).

Height:	160 cm
Opening diameter under tripod:	157 cm
Leg spacing:	116 cm

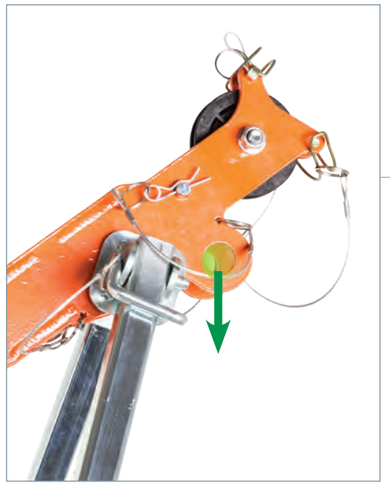
TM 14-ZSE



The pulley with
2 anchor points

NORM:	LIFTING AND LOWERING:	COMPATIBLE WITH :
EN 795/B:2012 TS 16415/B:2013 CE Ex	Max. 2 persons	RUP 502-U RUP 503-U RUP 504 RUP 505-U RUP 506 CRW 200 CRW 300

DESCRIPTION OF DEVICE:

TM 14 is a dual-purpose system: standard safety tripod and rescue frame.

The pulley is made of powder coated galvanized steel and has a wheel for guiding the winch rope when used as rescue frame. The pulley has an additional anchor point which can be used for e.g. mounting a retractable type fall arrester.

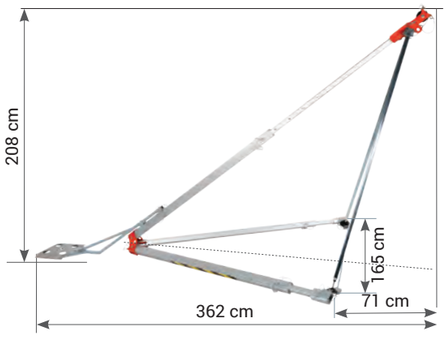
Supports with feet provide stability for arm with pulley at its end. They are made of aluminium and galvanized steel.

In order to improve the strength of the structure, the tripod legs with supports at their ends are secured with a steel chain.

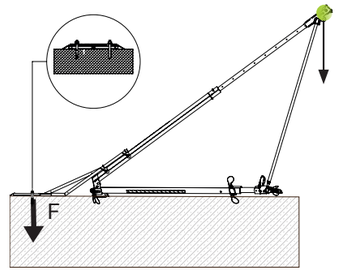
The drive-on plate is made of galvanized and stainless steel and is used for installation of counterweight. Counterweight can be a set of steel plates or a vehicle weighing 3.5 t. The plate can be fixed to the ground by means of mechanical or chemical anchors.

Set of steel plates can be used as counterweight if the tripod cannot be anchored by a vehicle or fixed to the ground. Comprises 19 special plates made of powder coated steel of 25 kg each.

Height:	208 cm
Extension:	71 cm
Overall length:	362 cm
Leg spacing:	165 cm
Weight:	65 kg
Lifting and lowering:	max 200 kg

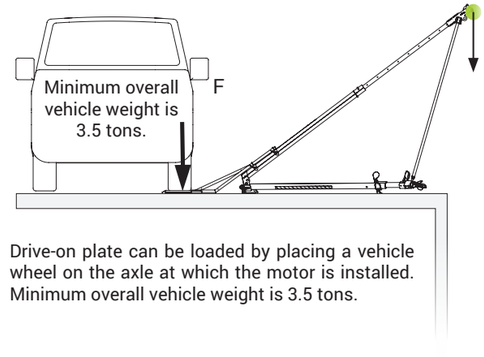


ANCHORING TO THE GROUND



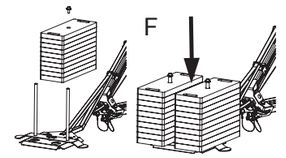
Drive-on plate can be fixed to a concrete or steel surface by means of at least 2 mechanical or chemical anchors with minimum tensile strength of 12 kN.

VEHICLE AS A COUNTERWEIGHT



Drive-on plate can be loaded by placing a vehicle wheel on the axle at which the motor is installed. Minimum overall vehicle weight is 3.5 tons.

SET OF STEEL PLATES AS A COUNTERWEIGHT



Drive-on plate can be additionally loaded with special steel counterweight plates of 25 kg each.

STEEL PLATES SET AT015-600.

- Counterweight plates - 16 pcs
- Set of mounting screws - 1 pc
- Counterweight bracket rods - 2 pcs
- Rods plate - 1pc

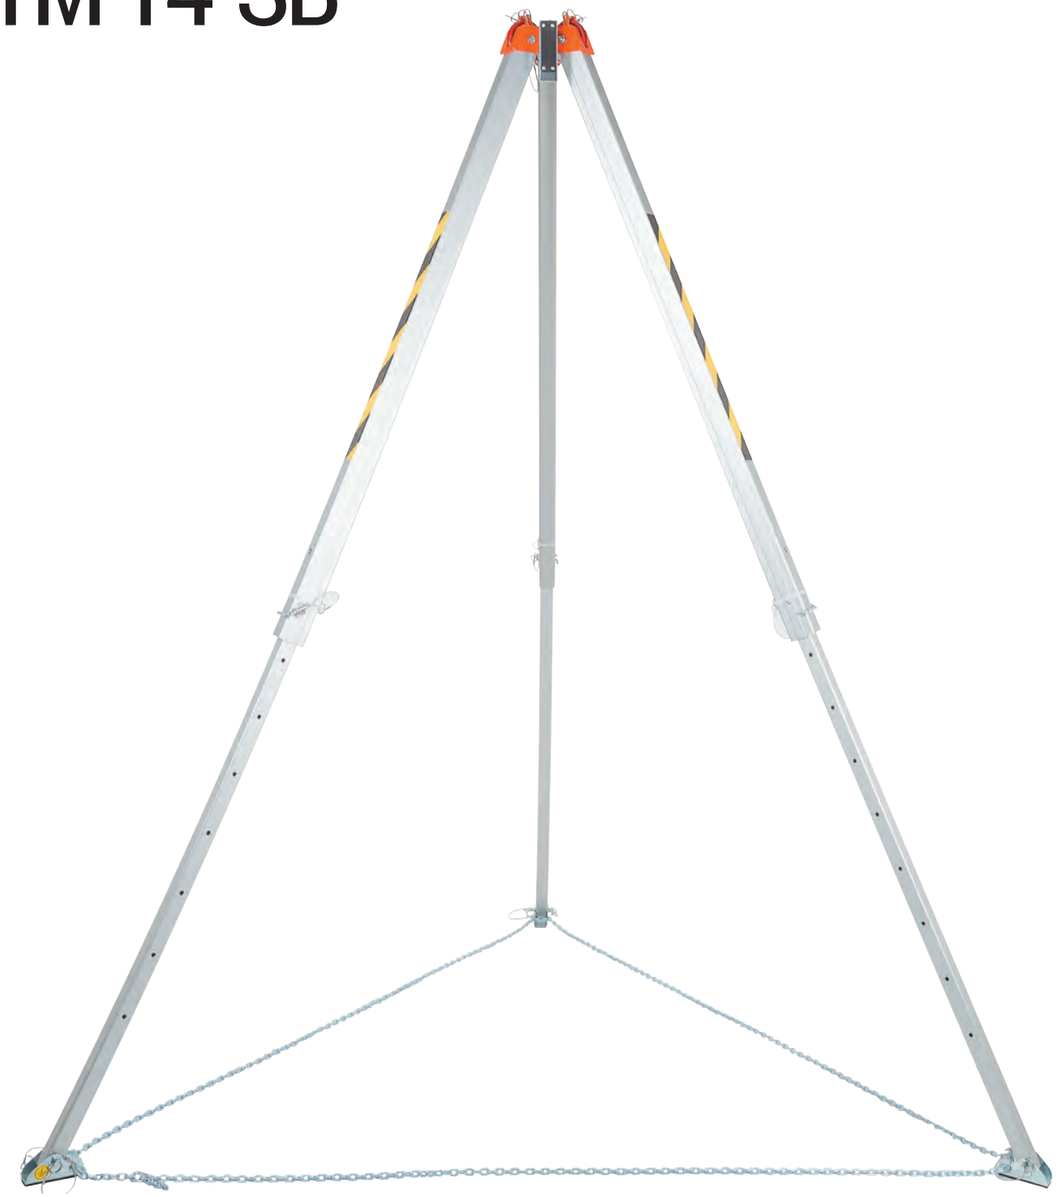
TM 14-SB



The head is made of powder coated galvanized steel. Two wheels for guiding the work rope rescue devices. Cotters above the wheels prevent the rope from accidental slipping during work.

The tripod legs are made of strengthened aluminium profiles with 9-step adjustment, locked with cotters. Two legs “A” are equipped with a wheel (for guiding the work rope) and anchor point (bore) for mounting winches; the third leg “B” has no wheel or anchor point.

Aluminium steps are mounted with cotters and provide easier access to the tripod head when extending the legs to their maximum height.

Steel feet have rubber pads for flat surfaces and spiked edges for slippery surfaces.

Tripod legs can be secured with textile webbing or steel chain.

Height:	179 - 289 cm
Opening diameter under tripod:	158 - 256 cm
Leg spacing:	147 - 232 cm
Device weight:	38 kg
Anchor points on head:	3
Lifting and lowering:	max. 2 persons
Transport dimensions:	228 x 32 x 30 cm

EXTENSION KIT FOR TM 14-ZSE

Additional option – kit AT015-150

The kit upgrades tripod TM 14-SB to version TM 14-ZSE

The kit comprises:
- Pulley - 1 pc
- Bracket - 2 pcs
- Head support - 1 pc
- Drive-on plate - 1 pc
- Left bracket base - 1 pc
- Right bracket base - 1 pc
- Chain - 1 pc

The lightweight TM15 aluminium safety tripod is an anchor point according to EN795/B and TS16415/B and can be used as a fall protection equipment. The TM15 tripod provides protection for up to 3 people at a time. The TM15 tripod consists of a powder-coated aluminium head with 3 ball-bearing polyamide rollers. The tripod is also equipped with 3 anchorage points on the side walls of the tripod head. Each of these points can be used as an anchor point for equipment to protect against falls from height. One point is designed for a maximum of one user at a time.

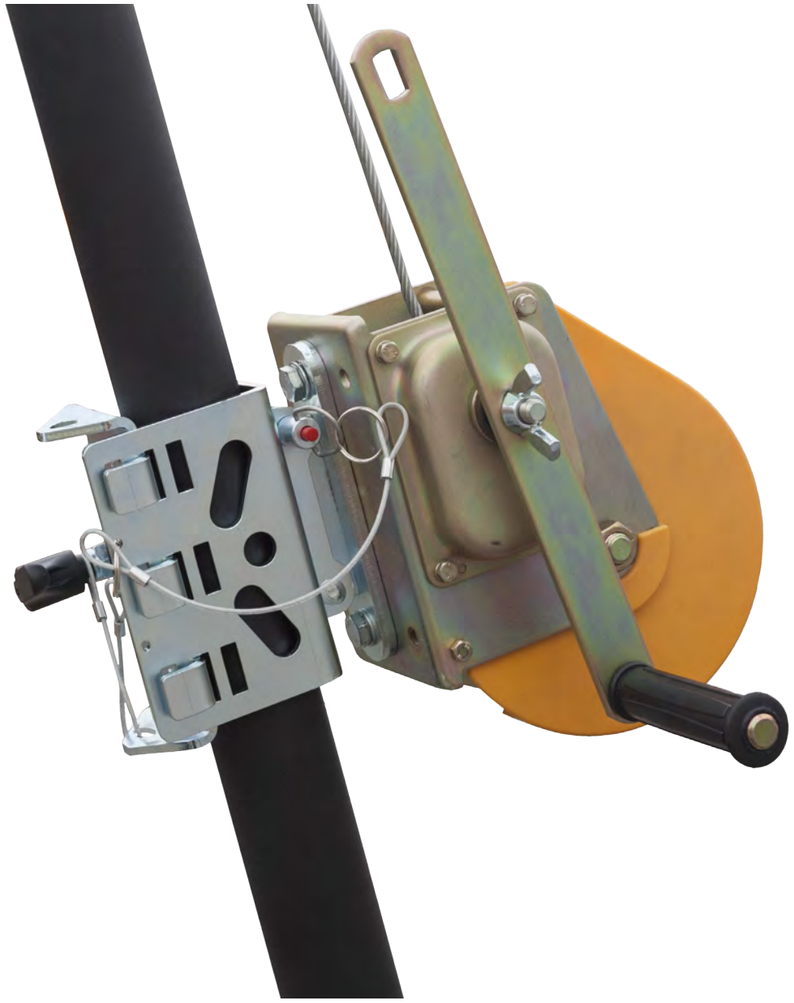
RUP 502-U



RUP 502-U is a winch equipped with a clamp for mounting on tripod leg. The winch is equipped with six-strand steel cable with natural fibre kern of 20 and 25 m in length and 6.3 mm in diameter;

RUP 502 is a component of rescue equipment. The device, can be lifted from a lower level onto a higher level or vice-versa.
The descent distance cannot be more than 2 m.

With the ratio used in the mechanism it is possible to make one turn of the drum per 5 turns of the winch's crank.

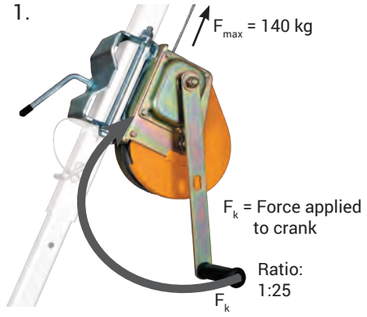
The crank arm is available in 2 lengths which, depending of the variant chosen, enable torque adjustment.

The RUP 502 rescue device complies with EN 1496/B.

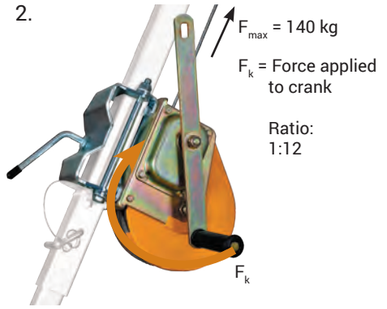
Accessories:

Spring-type energy absorber SDW

1.



2.



LOADS:

Variant 1:

At load weight (Fmax) of 140 kg force applied to the crank (Fk) shall be 5.6 kG.

Variant 2:

RUP 505-U

RUP 505-U is a rescue lifting device equipped with clamp for mounting of the device on a tripod leg. The lifting device operates with static textile ropes of length as required by the customer. The rope should be ordered separately.

RUP 505-U is a component of rescue equipment.Using the device, a casualty can be lifted from a lower level onto a higher level or vice-versa. The descent distance cannot be more than 2 m;

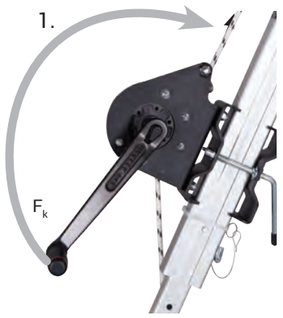
With the ratio used in the mechanism it is possible to make one turn of the drum per 2.13 turns of the device's crank or in the second mode, 6.2 turns;

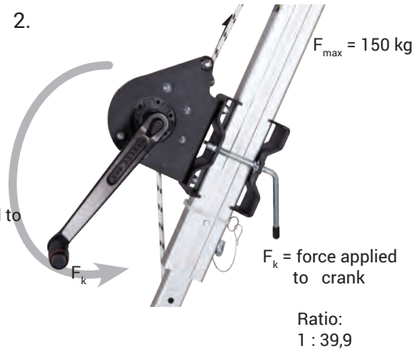
The crank is easily dismounted to facilitate transport;

The RUP 505 rescue device complies with EN 1496/B.

Accessories:

Spring-type energy absorber SDW





1. 2.

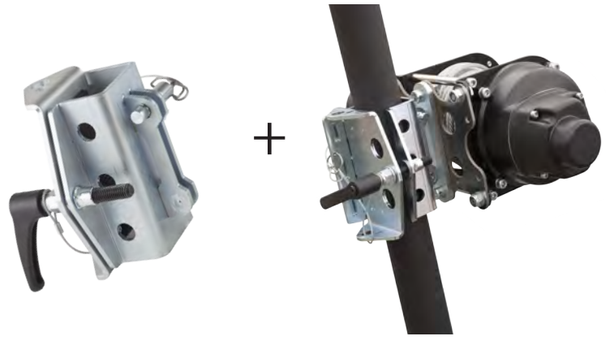
LOADS:

Variant 1:

At load weight (Fmax) of 150 kg force applied to the crank (Fk) shall be 11,11 kG

Variant 2:

At load weight (Fmax) of 150 kg force applied to the crank (Fk) shall be 3,75 kG



INSTALLATION:

Simple mounting of the device on the tripod leg by means of a clamp:

1. Utb Clamp
2. RUP 505-U

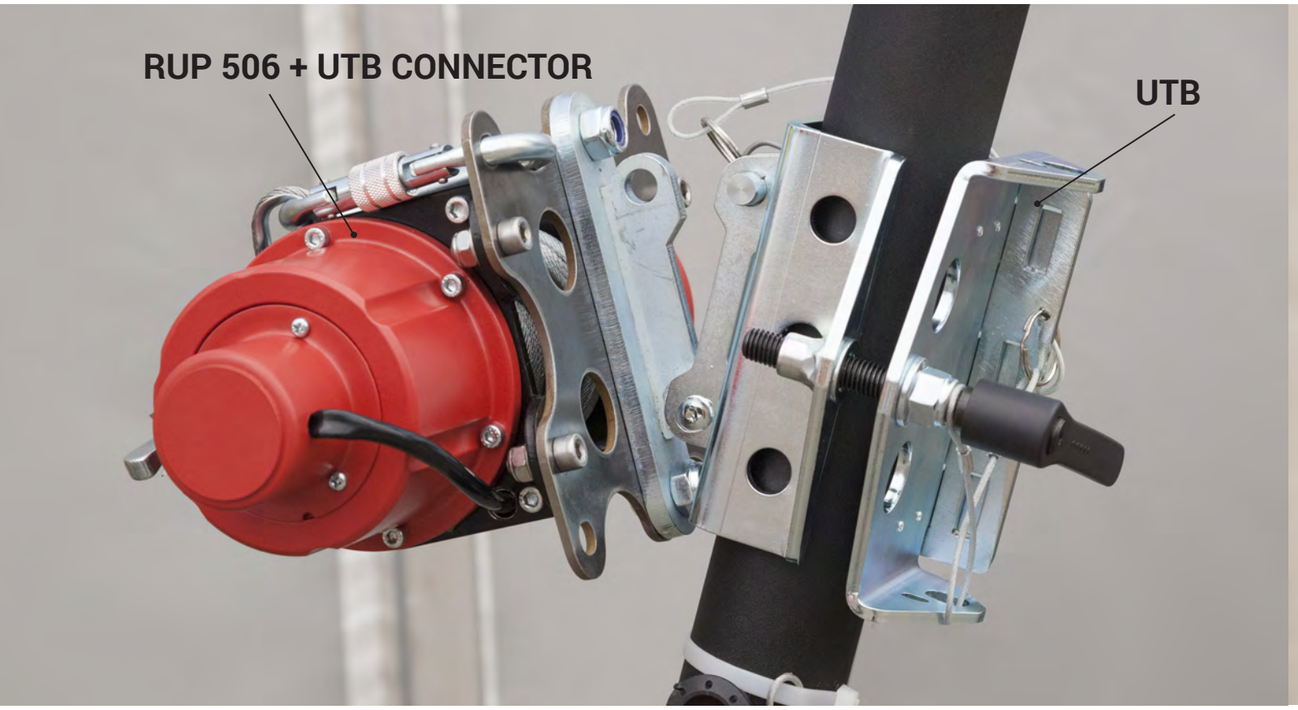
RUP 506

RUP 506 cable battery powered winch

Electric battery winch equipped with a wire rope of 5mm in diameter and of the lenght of 15m, rolled on a drum.
The device is used to lift goods. Admissible working load while lifting goods (WLL): 140kg.
If an additional TU415/TU416 block is used, the working load when lifting goods (WLL) can be increased to 250kg.
The device can be used to lift and descend people and to evacuate them when an additional self-holding device of the WR / CR / CRW series is used. Admissible working load when lifting/descending people (WLL): 140kg.
Battery backup. The kit includes two 18V 4.0Ah batteries together with a charger.
The battery life at full load equals ~ 20...25 minutes.
Operating speed: 4m/min (when using TU415/TU416 block - 2m/min).
The device is equipped with a tie plate (RUP506-000-001) as well as with a UTB connector (AT017-330).

PARAMETERS

Weight:	10 kg
WLL:	140 kg - for cargo
Diameter of the rope:	5 mm
Length of rope:	15 m
Type of rope:	steel
Dimensions:	288 x 122 x 144
Compatible with:	TM 1, TM 6, TM 9-N, TM12, TM12-2, TM 14, TM 15



RUP 504

RUP 504 cable single-phase 230V electric winch

A 230V AC 1-phase electric winch equipped with a wire rope of the diameter of 6mm and the length of 30m rolled on a drum. The device is used to lift goods. Admissible working load while lifting goods (WLL): 500kg. If an additional TU415 / TU416 block is used, the working load when lifting goods (WLL) can be increased to 1000kg. The device can be used to lift and descend people and to evacuate them when an additional self-holding device of the WR / CR / CRW series is used. Admissible working load when lifting / descending people (WLL): 200kg. A 230V 1-phase alternating power supply. The kit includes a cable for connection to the mains with an EU plug.Operating speed: 7m/min (when using TU415/TU416 block - 3.5m/min).
The device is equipped with a tie plate (RUP506-000-001) as well as with a UTB connector (AT017-330).

PARAMETERS

Weight:	21 kg
WLL:	500 kg - for cargo
Diameter of the rope:	6 mm
Length of rope:	30 m
Type of rope:	steel
Dimensions:	490 X 170 X 180
Compatible with:	TM 6, TM 9-N, TM12, TM12-2, TM 14, TM 15

CRW 200

Hook with fall indicator

CRW 200 is a combination of a retractable type fall arrester and a rescue lifting device. The device is equipped with a manual winch featuring lift and descent functions.In order to install on the tripod, first mount an adequate mounting clamp;

Connector has a fall indicator; the design requires no energy absorber;

Permissible work load: 140 kg;

With the ratio used in the mechanism it is possible to make one turn of the drum per 7.4 turns of the winch's crank;

Retractable type fall arrester CRW 200 is a component of personal fall protection equipment and conforms to EN 360 and EN 1496/B.

F_k = force applied to crank
Ratio: 1:22

F_{max}

At load weight (Fmax) of 140 kg force applied to the crank (Fk) shall be 6.4 kG.

CABLE LENGTH VARIANTS:	CABLE PARAMETERS:	OVERALL MECHANISM RATIO:	SPUR GEARING:	COMPATIBLE WITH :

RUP 502-BT

RUP 502-BT is a winch equipped with clamp for mounting on tripod leg. The winch is equipped with six-strand steel cable with natural fibre kern of 25 m in length and 6.3 mm in diameter;

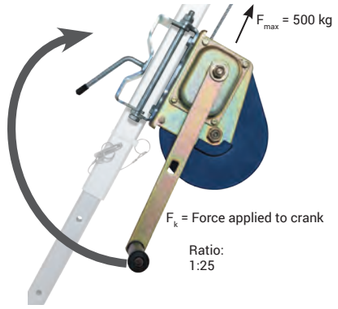
Intended for lifting loads with weight of up to 500 kg;

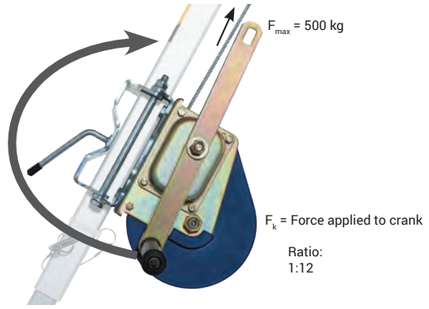
With the ratio used in the mechanism it is possible to make one turn of the drum per 5 turns of the winch's crank;

The crank arm is available in 2 lengths which, depending of the variant chosen, enable torque adjustment.

Accessories:

Pulley PL 101





LOADS:

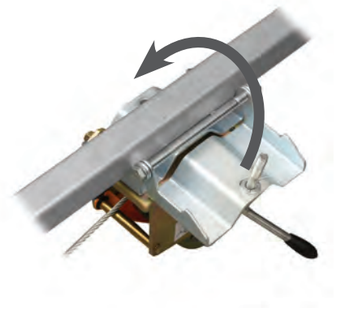
Variant 1:

At load weight (Fmax) of 500 kg force applied to the crank (Fk) shall be 20 kG.

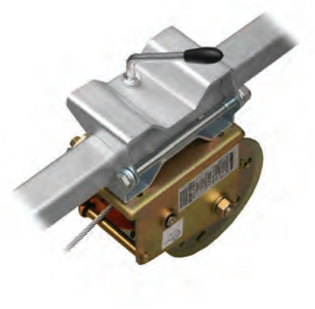
Variant 2:

At load weight (Fmax) of 500 kg force applied to the crank (Fk) shall be 41.6 kG.

1.



2.



ASSEMBLY:

Simple mounting of the winch on the tripod leg by means of a clamp:

1. Clamp opened;
2. Clamp closed.

KIT:

Rescue winch RUP 502-BT is offered with pulley PL 101.

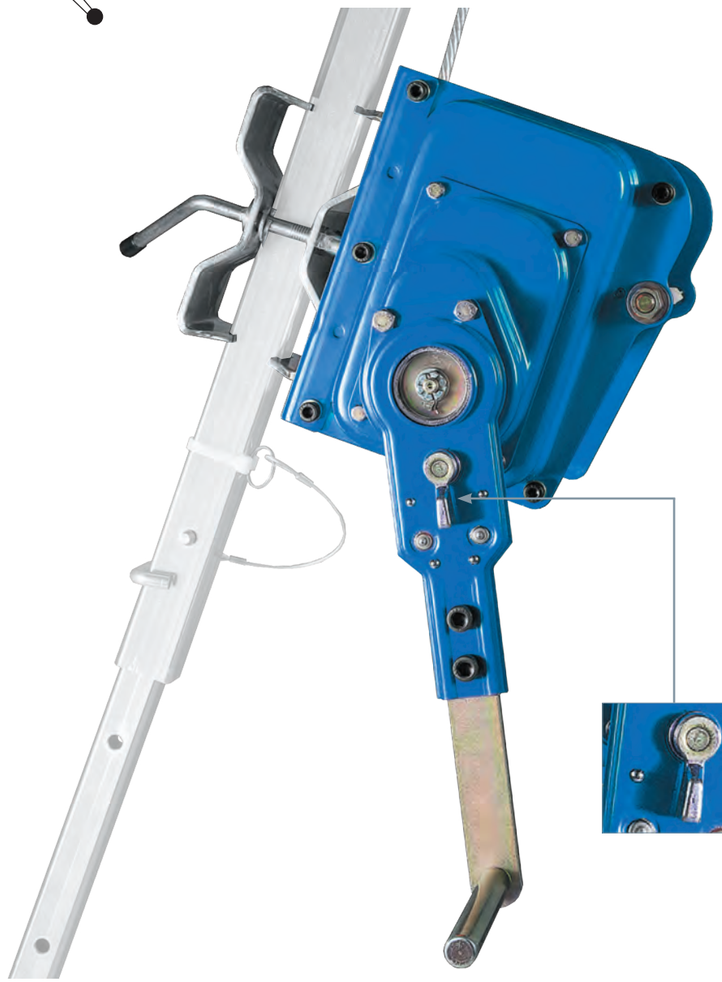
RUP 503-BT



Switch for winch mechanism clutch disengagement and switching of descent/lift modes.

RUP 503-BT is a winch equipped with clamp for mounting on tripod leg. The winch is equipped with six -strand steel cable with natural fibre kern, available in options of 25 m, 35 m, 45 m, 50 m in length and 6.3 mm in diameter;

Intended for lifting loads with weight of up to 1000 kg;

With the ratio used in the mechanism it is possible to make one turn of the drum per 22.2 turns of the winch's crank;

Crank arm can be disassembled for easier transport.

PULLEYS
PL 101, TU 415, TU 416

CABLE DIAMETER:

- ∅ max. 6.3 mm for steel cable
- ∅ between 8 and 12 mm for textile rope

WORK LOAD:

Permissible work load: 10 kN

CABLE DIAMETER:

- ∅ max. 6.3 mm for steel cable
- ∅ between 8 and 12 mm for textile rope

WORK LOAD:

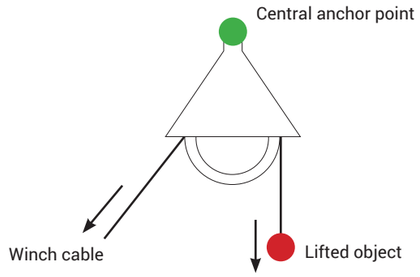
Permissible work load: 10 kN

CABLE DIAMETER:

- ∅ between 6.3 mm and 8 mm for steel cable
- ∅ between 10,5 and 14 mm for textile rope

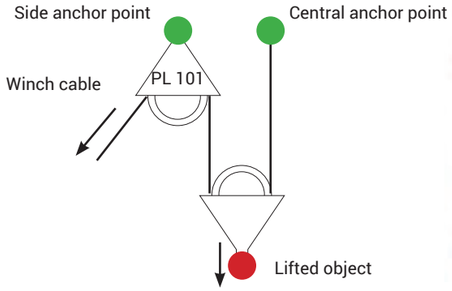
WORK LOAD:

Permissible work load: 20 kN



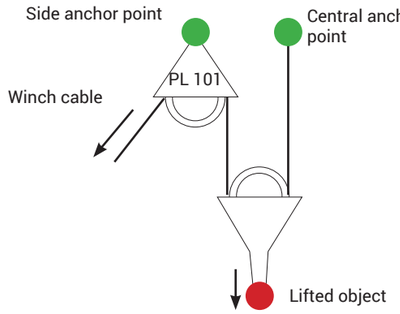
PL 101

Basic pulley of 90 mm in diameter attached at anchor point on the tripod head. Made of galvanized steel and polyamide. Connected to anchor point by means of connector AZ 090.



TU 415

Pulley TU 415 with steel hook is used for lifting and lowering loads with weight of up to 1000 kg. It can be used both with steel cables (of up to 6.3 mm in diameter) and textile ropes (of diameters between 8 and 12 mm). The mechanism ratio 2:1 enables reduction of the force required to lift a given load, thus allowing for lifting of as much as twice the load using a given winch. The product can be used with all winches and tripods. When used with tripods and winches with admissible load of 500 kg (TM 9 series) it is possible to increase the load capacity of the whole combination up to 1000 kg.



TU 416

Pulley TU 416 with steel hook is used for lifting and lowering loads with weight of up to 2000 kg. It can be used both with steel cables (between 6.3 and 8.0 mm in diameter) and textile ropes (of diameters between 10,5 and 14 mm). The mechanism ratio 2:1 enables reduction of the force required to lift a given load, thus allowing for lifting of as much as twice the load using a given winch. The product can be used with all winches and tripods. When used with tripods and win-ches with admissible load of 1000 kg (TM 6-T, TM 12, TM 12-2, TM 15) it is possible to increase the load capacity of the whole combination up to 2000 kg.
